Los Angeles District  
Corps of Engineers  
Office of the Chief, Regulatory Branch  
Arizona-Nevada Office, 82256-9722

April 26, 1994

Dear Ms Lester:

Pursuant to your request in the letter dated 28 Feb 94, the Salt River Pima-Maricopa Indian Community (Community) provides this letter to confirm substantial completion of the Cement Stabilized Alluvium construction at the Tri City and Center Street landfill. We have attached a letter provided by our design consultant, Simons Li & Associates for your review.

The Community is in agreement with the attached Simons Li & Associates letter which states the following :

- SLA acknowledges that the Project has been completed in substantial conformance with the plans and special provisions.
- SLA recommends that Horne Road be filled with backfill material to provide additional protection. Although this task is not identified in the plans or specifications, the Community agrees that this additional fill will provide additional protection and has agreed to do the additional work.
- SLA states that there is a minor amount of excavation required at the upstream end of the project. The additional excavation will provide the backfill for the Horne Road backfill.
- Completion of the 85% backfill will continue with the landfill capping operation.

The Community is scheduled to complete the backfill in the Horne Road area in May 1994. The 85% backfill will be completed with the capping operation on the adjacent Landfill Closure Project. The capping operation is scheduled for completion in July 1994.

If there are any questions or additional information required to close out your files,  
please call me at 941-7346.

Sincerely,

A handwritten signature in black ink that reads "Bryan D. Meyers". The signature is fluid and cursive, with a long horizontal stroke extending from the end of the name.

Bryan D. Meyers  
Project Manager
